Objective

I, Rafid Hassan Risun, a Computer Science and Engineering graduate from American International University-Bangladesh (AIUB), am seeking an opportunity in the software industry to apply and expand my skills in frontend development and React Native mobile application development. With a strong passion for creating intuitive user experiences and efficient solutions, I aim to contribute meaningfully to the software and technology sector through innovative, user-focused design and development.

Projects

Portfolio Website | Next.js, Tailwind CSS

[Live] [Github Repo]

Quest Around | Expo React Native, NestJS, Postgres (work in process)

A Map application (in development) using React Native Maps, featuring an original UI inspired by Deshi culture with a gaming vibe. Its goal is to connect neighborhood communities, enabling people to communicate, share needs, and offer services. This long-standing vision will expand in the future with money exchange and paid event features.

(IOS Only for now)

ManageResto | Angular, Bootstrap, .Net Core, Postgres

A Multi tenant POS application where you can register orders, customize, put on hold, make payment. A terminal Dashboard to have a clear picture on on-going orders and an overall summary. An admin section to make changes in the menu items, categories, variations etc.

Doctor Appointment Management System | Nextjs, Tailwind CSS, Axios

An advanced, full-stack web application for managing doctor appointments, built with Next.js, TypeScript, Tailwind CSS, and Axios. This system provides seamless experiences for both patients and doctors, including authentication, dashboards, appointment booking, notifications, and more.

[Github Repo]

[Live Demo]

Student Community Platform | NestJS, NextJS, Tailwind CSS, Postgres

A Social Media Platform for students to create profile, Newsfeed, Make friends, Join groups, Chat, Job search, Forums, Events, Notifications, Search has a subscriptions system, Admin page and many more.

[Frontend Repo]

[Backend Repo]

[Video Demo]

Digital Art Marketplace | HTML, CSS, PHP, Javascript, AJAX

A website to upload your artwork, showcase it in your profile, be featured in newsfeed, sell it to other users, buy from others, chat with others, search other users, notification system, cash in, transaction history, edit or delete profile.

[Github Repo]

Work Experience

ThreeSquare

March 2025-August 2025

Software Developer Intern

Aronnyo Jon

February 2024-August 2024

Illustrator of the company released comic book "Shoronkholer Golpo"
